PROFESSIONAL SUMMARY

Full Stack Web Developer with hands-on experience in React.js, JavaScript, Node.js, Express.js, MongoDB, and REST API development. Built responsive projects including an Expense Tracker, Movie Explorer, Task Manager, Portfolio, and EVM Simulator. Currently learning React Native and Expo for cross-platform mobile development. Possesses 2+ years of professional experience in the BPO sector, developing strong communication, problem-solving, teamwork, and customer-handling skills. Seeking a full-time entry-level role or internship to contribute to real-world projects and develop industry-level expertise.

EDUCATION

J.C. Bose University of Science and Technology, YMCA

Bachelor of Technology in Computer Science and Engineering - CGPA 7.5

2022 - 2026

Government Polytechnic Barauni Begusarai

Diploma in Computer Science and Engineering - CGPA 7.8

2018 - 2021

R K J S 10+2 High school Naula Garh Begusarai

Class 10 (Secondary Education) - 70%

2018

PROJECTS

Expense Tracker — MERN Stack [🔗](#)

- Developing a full-stack expense management application using React.js, Node.js, Express.js, and MongoDB.
- Created separate client and server architectures for better scalability and maintainability.
- Configured the Express server, environment variables, MongoDB connection, and development workflow.
- Working on expense management, category organization, dashboard analytics, and transaction tracking.
- Using Axios for communication between the frontend and backend.
- Deployed the application using Vercel.

Movie Explorer — React.js [🔗](#)

- Developed a responsive movie discovery application using React.js, Vite, React Router, and the OMDb API.
- Implemented movie search, detailed movie information, loading states, error handling, and page navigation.
- Integrated Axios to retrieve real-time movie information from an external REST API.
- Created a favourites feature using Local Storage for persistent user data.
- Deployed the application using Vercel.

Task Manager — React.js [🔗](#)

- Developed a task management application using React.js and JavaScript.
- Implemented functionality to add, complete, and delete tasks.
- Used React state management to update the interface dynamically.
- Created reusable components and a responsive user interface.
- Deployed the application using Vercel.

EVM Simulator — React Native (Ongoing) [🔗](#)

- Developing a cross-platform EVM Simulator using React Native, Expo, JavaScript, and reusable components.
- Implementing candidate selection, vote submission, duplicate-vote prevention, and result calculation using state management.

SKILLS

Frontend: HTML5, CSS3, JavaScript, React.js, React Router, Vite, Responsive Web Design

Backend: Node.js, Express.js, REST APIs

Database: MongoDB

Mobile Development: React Native, Expo, Expo Router

Programming Languages: JavaScript, TypeScript, Java, Go

Developer Tools: Git, GitHub, VS Code, Postman, npm, EAS Build, Vercel

Currently Learning: TypeScript and Advanced React Native

Concepts: Component-Based Architecture, API Integration, CRUD Operations, State

Core CS: Data Structures and Algorithms, DBMS, Operating Systems, OOP
