WORK EXPERIENCE

Freelance Full Stack & React Native Developer

React.js, React Native, Expo, Node.js, Express.js, MongoDB

Jun 2026

- Working with clients to build responsive web and cross-platform mobile applications using React.js, React Native, and Expo.
- Building full-stack features with Node.js, Express.js, MongoDB, REST APIs, authentication, CRUD operations, and third-party API integration based on client requirements.
- Collaborating on feature requirements, UI improvements, bug fixes, and application updates while using Git/GitHub and Postman.
- Deploying web applications on Vercel and preparing Android builds using Expo EAS Build.

PROJECTS

Expense Tracker — MERN Stack [🔗](#)

- Developed a full-stack expense management application using React.js, Node.js, Express.js, and MongoDB.
- Structured separate client and server codebases for scalability and maintainability.
- Implemented expense management, category organization, dashboard analytics, and transaction tracking.
- Integrated Axios for communication between the frontend and backend.
- Configured the Express server, environment variables, MongoDB connection, and development workflow.
- Deployed the application on Vercel.

Movie Explorer — React.js [🔗](#)

- Developed a responsive movie discovery application using React.js, Vite, React Router, and the OMDb API.
- Implemented movie search, detailed movie information, loading states, error handling, and page navigation.
- Integrated Axios to retrieve real-time movie information from an external REST API.
- Created a favourites feature using localStorage for persistent user data.
- Deployed the application on Vercel.

EVM Simulator — React Native [🔗](#)

- Developed a cross-platform Electronic Voting Machine (EVM) Simulator using React Native, Expo, and reusable components.
- Implemented candidate selection, vote submission, duplicate-vote prevention, real-time vote counting, and result calculation using state management.
- Built a responsive mobile interface with structured navigation and candidate-wise result display to simulate a complete electronic voting workflow.

SKILLS

Frontend: HTML5, CSS3, React.js, React Router, Vite, Responsive Web Design.

Backend: Node.js, Express.js, REST APIs

Database: MongoDB

Programming Languages: JavaScript, TypeScript, Java, Go

Mobile Development: React Native, Expo, Expo Router

Tools: Git, GitHub, VS Code, Postman, npm, Vercel, EAS Build

Concepts: API Integration, CRUD Operations, State Management, Component-Based Architecture

Core CS: Data Structures & Algorithms, DBMS, OOP, Operating Systems

EDUCATION

J.C. Bose University of Science and Technology, YMCA

Bachelor of Technology in Computer Science and Engineering | CGPA: 7.5/10

2022 - 2026

Government Polytechnic Barauni Begusarai

Diploma in Computer Science and Engineering | CGPA: 7.8/10

2018 - 2021

RK JS 10+2 high School Naulagarh Begusarai

Class 10 (Secondary Education) | 70%

2008 - 2018

CERTIFICATIONS & ACHIEVEMENTS

LeetCode: 50-Days Badge | Ranked Under 200 in a Weekly Contest | August Daily Coding Challenge Badge

Certifications: Data Structures & Algorithms (DSA) Certification | JavaScript Certification — freeCodeCamp
